NOTE.—Following on a special research, the index has been revised throughout in order to eliminate the effects of Treasury Bills and other special transactions on behalf of Governments and the effects of bank amalgamations. This index represents the ratio of monthly clearings to the average for the months concerned during the five years 1926-1930. Seasonal fluctuations are, therefore, virtually eliminated. The trend has been smoothed out by taking a three months moving average. No allowance has been made for normal growth or change of price levels.

§ Index not ascertainable on account of suspension of State Government banking transactions.
